Subject: conversions

Lou--

could you do me a favor? In working with the 1/24/02 TT air data, I noticed that all chemicals other than PCE are in mg/m3. I think I remember you saying that converting these results to ug entailed more than just dividing by 1000. Would you mind converting the following to ug for me?

Bromoform--sample TC-12

1,2dichloroethane samples
TC-02,03,04,05

thank you!
